

Comenius

We've learned a lot from these trips, both cultural and connections. Now we've gotten a lot of international friendships. We've seen a lot of landmarks of the countries we've been too. We've generally seen a lot of things from other countries, and we've learned a lot about communicating with other students from all across the world. We've too seen other communities, and we've discovered how different people can be. We saw a lot of things and meet wonderful families, and we have discovered the joy of international travelling. We think that it's amazing how a little school, like ours, got to be in this project, and we're very grateful for it. And it's not just the people of Germany we meet when we go on a trip like that, no we met Italians and Portuguese and all other kinds of nationalities.

Germany

The trip to Germany was great for many reasons, we were on many trips to different parts to South Germany, we got to come up on a mountain and eat while looking out from the edge and we could see all the other mountains of the Alps. Hohenburg was the school that we visited, it's really beautiful and full of culture. We got to experience the life of German students and learning other languages is so much easier when you actually have to use them.

Portugal

We are two girls from Denmark there was in Portugal in May 2014. We learned a lot of things about other people and their culture. Special when we was alone at the families we learned a lot about the country, and what they was eating. We also talk with the people from the other countries, and we are still sometimes talking with the people on Facebook. Before this we didn't know that we could be friends after only 5 days, but we get wrong. It's really amazing that we could communicate in a language everybody

understand when we was living in defriend countries all over europe.
